Dear John,

Enclosed please find a few before and after photographs of the antique radio restoration you performed for me. The 1938 Zenith 12-S-266 was only made for 1 year so it is truly a unique piece. Your cabinet restoration is utterly amazing, you would never know the top was replaced and that there were delaminated veneer issues throughout the front. I'm happy to have it back in showroom condition. For reference Matt of Mayfair Electronics, did a wonderful job restoring the chassis to a fully functional radio.

As I mentioned, I have another smaller radio I intend to restore later this year, so assuming you are interested we will have an opportunity to do business again.

Thanks again, beautiful work!

/Joe
